Phone: 229-507-6479 • Email: tzyoung@valdosta.edu • GitHub: <https://github.com/TylerY7>

Technical Skills

Programming Languages:

- Java (Advanced)
- Python (Intermediate)
- Go (Beginner)

Tools & Platforms:

- SourceTree
- JavaFX
- Git
- Docker
- Maven

EDUCATION

Bachelor of Science in Computer Science

July 2025

GPA: 3.48

Valdosta, GA

Valdosta State University

EMPLOYMENT HISTORY

Student Assistant ID Office, Valdosta State University, Valdosta, GA, July 2023 – Present

- Assists in processing and distributing student, faculty, and staff identification cards.
- Maintained confidentiality of student personal data in compliance with the Family Educational Rights and Privacy Act (FERPA).

402nd SWEG Intern, Warner Robins AFB, Warner Robins, GA, June 2024 – July 2024

- Designed interactive and dynamic features for a user interface using JavaFX
- Utilized different software such as Docker, Git, SourceTree, and Maven to ensure project progress
- Utilized Scrum and AGILE principles to manage and streamline development processes, ensuring efficient and iterative project progress

PROJECTS

CRM Backend Application | Lead Developer

December 2024 – December 2024

Developed a server-side application to manage customer data with CRUD functionality

- Built an HTTP server using Go to handle CRUD operations for customer data.
- Implemented a static HTML page for brief overview of the API.

- Utilized Postman for API request testing and debugging.
- Integrated Google's uuid package to generate unique identifiers for each customer.
- Designed the backend to handle HTTP requests, parsing incoming data, and sending appropriate API responses.
- Demonstrated effective API design and routing to ensure smooth communication with potential front-end frameworks.

Senior Capstone Project | Team Member

January 2025 – Present

Developed an application that performs automatic classification of a CIFAR-100 image that is selected and loaded by the user from the disc / storage of the computer / device.

- Applied Pytorch and Python to create various classification models with varying learning rates as well as implement performance metrics to test different models.
- Used tkinter to produce a front-end for the user to interact with the application.
- Cooperated in a team setting to achieve biweekly goals that eventually assembled a quality project.
- Employed TensorBoard to provide visualizations for losses across epochs for different learning rates.

Software Engineering Class Project | Team Member

August 2024 – December 2024

Developed a mock auctioning system with a front-end and back-end features supported

- Collaborated with three other classmates to deliver a product that fulfilled project standards.
- Followed Software Engineering principles and Scrum methodology that achieved industry standards and continuous project feedback.
- Utilized JavaFX and Java to create front-end and back-end features respectively.

EXTRACURRICULAR ACTIVITIES

President, Association for Computing Machinery (ACM)

- Managed team operations, coordinated activities, and facilitated networking opportunities for members.
- Led the organization of events and initiatives, fostering a collaborative environment for students interested in computing and technology.

University Ambassador

- Represented the university at various events, helping to promote its programs and initiatives to prospective students and other stakeholders.
- Enhanced communication, leadership, and organizational skills.
